

# Production Plan

Sheet 25

## Production plan:

Here you will need to show the examiner what steps you went through to make each of your products. Include the photographs that you teacher has been taking. Try to keep this onto one sheet if you can, include:

- o What materials, glues, tools and finishes you used.
- o State what went wrong and why and what you did when it went wrong.
- o Write down what measurements you used.
- o Use drawings if photographs are not available.
- o Add evaluations to your stages, eg: I would not do this stage again because it didn't work well, next time I would do it this way?
- o Add photographs if needed of the finished item on each page.
- o List any failures or modifications you made along the way aswell.
